

Write a LEX program to count the number of vowels in the given sentence.

Program: (vowels.l)

```
%{
    int vow_count=0;
    int const_count =0;
}%

%%
[aeiouAEIOU] {vow_count++;}
[a-zA-Z] {const_count++;}
%%
int yywrap(){
int main()
{
    printf("Enter the string of vowels and consonants:");
    yylex();
    printf("Number of vowels are: %d\n", vow_count);
    printf("Number of consonants are: %d\n", const_count);
    return 0;
}
```

Output:

G:\lex>flex vowels.l

G:\lex>gcc lex.yy.c

G:\lex>a.exe

Enter the string of vowels and consonants: Vowel sounds allow the air to flow freely, causing the chin to drop noticeably, whilst consonant sounds are produced by restricting the air flow

Number of vowels are: 42

Number of consonants are: 77

^C

G:\lex>
